Good afternoon LTI team,

We are pleased to share with you that our team got recognized for successfully launching the Online Wires. This has been in the works for a long time and our team has supported the production deployment and support activities in production. This has provided great value to our customers.

More so, Samapika and Amol were also recognized for their exemplary work related to the BDB Accessibility Initiative. Samapika and Amol achievements were announced on the May 24th cross team meeting. Together they were able to resolve some of the pain points of our ADA compliance. The recognition highlights their achievements.

Amol was instrumental in identifying and addressing an issue for the ESC key being a global key and any changes would have undesired wider implications.

Samapika did the majority of ADA related testing and find new ways to test the changes.

Thank you,

Barbu Fodor (also on behalf of Thomas Alexander)

Scrum Master
