Hi Amol, Vikas, Deepak, and Samapika,

I have some wonderful news to share with all of you. Our client has provided us with exceptional feedback regarding the amazing work you have been doing. Your dedication and hard work have not gone unnoticed, and I wanted to take a moment to personally thank each one of you.

You are the best team anyone could ask for, and your efforts have made a significant impact. Keep up the excellent work.

Thanks & Regards,
Bindu.

Hi Amit/Prashant,

Although our engagement was short and lasted for just about a year, we had a good team going by the end of the stint. I would like to appreciate each individual here

Amol Pustode – Amol has been a good Front End developer. He has brought up issues and was very effective in completing our FE stories. He has spoken up and has been proactive in getting issues resolved. I would say that he is going to be a good addition to any team. Amol is not afraid of taking responsibility or ownership of items and that is very commendable.

Vikas Sahu – Vikas has worked on the Back End and we he has coordinated with Sagar and delivered good quality work for our team. As with everyone else, he has spoken up about issues and brought matters to the team which has helped us deal with issues in a timely manner. Vikas will excel in any team with his can do attitude and coordination skills.

Deepak Mishra – Deepak has worked on both the FE and BE systems and he has coordinate both well. At times when we do not have full representation on the team, he has taken up the responsibility of getting updates and letting us know what the status is. He is also an excellent communicator and was really helpful in getting the team united and coordinated in addition to doing his own work. He has shown good skills in communication and leadership.

Samapika Satapathy – Samapika has worked with Anna on the QA side and she has shown that she can handle testing completely on her own. She has given Anna time to concentrate on other work. She can be relied upon and called upon to take up the testing work. She has shown great understanding of the business side of the work and was able to point out defects on time and with care. I have seen her indicate problems that many people might not consider as issues, but she hasn't let those get through. I appreciate her for all the hard work and dedication she has brought to the team to increase our quality.

Thanks,

Thomas Alexander
