

Amol Pustode

Experience Summary

- 6.5 years of comprehensive experience as a Front-end Developer, with expertise in technologies such as Angular (versions 5/8/9/12/13/14/16), Angular Material (versions 3/4), HTML5, CSS3, JavaScript, TypeScript, Bootstrap (versions 3/4), and UI development.
- Skilled in accessing and implementing NPM packages and resolving dependency conflicts.
- Effectively manages cross-browser issues, working proficiently with Safari, Internet Explorer, Mozilla Firefox, and Google Chrome. Over this period, I have been actively engaged in all phases of the Software Development Life Cycle (SDLC) and have a solid understanding of the Agile Design Model.
- Exceptional understanding and experience in Angular environment and JavaScript language including ES6+ syntax and good knowledge of object-oriented programming, ability to write well-documented, clean JavaScript code.
- I have consistently displayed a willingness to expand my knowledge and adapt to emerging technologies and methodologies.
- Furthermore, actively engages with the Product Development team to ensure project execution aligns with organizational goals.

Skills Summary

Domain	Healthcare, Banking, Education
Programming Languages	Angular 5/9/10/12/13/14/16, Angular material, HTML 4/5, CSS (SCSS), NgRx store, JavaScript (ES6), jQuery, Bootstrap, TypeScript 4, Unit testing (Jasmin)
Operating System / ERP Version	Windows 10/11, Linux (Ubuntu)
Tools / DB / Packages / Framework / ERP Components	Visual Studio code, Postman, GitHub, Gitlab, Bracket, Sublime Text
Hardware Platforms	Intel Series

Work Experience

Project 1

Project Name	BMO - WIRES	Team Size	10
Company	LTIMindtree	Designation	Sr. Software developer
Start Date	OCT 2023	End Date	OCT 2024
Project Description	The BMO Wires application, developed with Angular for the front-end and Spring Boot for the back end, facilitates secure wire transfers between accounts as part of the BMO project. This application ensures robust security measures, seamless user experience, and efficient transaction processing.		
Role & Contribution	- Design and development of key features for the BMO Wires module, ensuring timely product deliverables and seamless user experience. - Played a key role in integrating third-party libraries and APIs using Angular framework to enable smooth communication between systems and enhance functionality. - Collaborated closely with backend teams to integrate APIs for secure and efficient data transfers within the microservice architecture. - Actively involved in requirement analysis, working alongside BA to gain a deep understanding of user needs and translate them into technical specifications. - Aligned feature development with functional specifications to meet project goals and improve module performance. - Contributed to the project's success in an Agile environment, participating in daily stand-ups, sprint planning, and retrospectives to track progress and resolve blockers. - Demonstrated strong technical acumen and project management skills, leading the team to achieve successful data migration and feature enhancements. - Evaluated requirements for continuous improvement, addressed bugs, and provided support to maintain and optimize existing functionality.		
Technology &Tools	Angular 16, RxJS, HTML5, SCSS, Typescript, NgRx store, Unit testing (Jasmin), JIRA (Agile methodology)		
Key Achievements	Received commendation from the client for effectively addressing key pain points related to ADA compliance and efficiently completing user stories. Demonstrated strong problem-solving skills and a commitment to delivering high-quality solutions.		

Project 2

Project Name	Kyma	Team Size	9
Company	CitiusTech Healthcare Technology Pvt Ltd	Designation	Sr. Software development Engineer
Start Date	JAN 2022	End Date	JUL 2023
Project Description	Kyma is a comprehensive platform offering ready-to-use visual and non-visual components designed to develop Patient Vital Monitoring applications. It caters to end users such as intensivists, clinicians, and nurses, providing them with efficient tools to monitor patient vitals effectively. The platform ensures seamless integration with existing healthcare systems, supports real-time data analytics, and enhances patient care through intuitive interfaces and robust security measures. Kyma's modular architecture allows for easy customization and scalability, making it an ideal solution for diverse healthcare environments.		
Role & Contribution	• Conducted thorough analysis and understanding of diverse consumer requirements. • Developed components and features in alignment with client specifications. • Implemented new features for the mobile application. • Contributed to the development of reusable Angular libraries for visual and data components. • Authored comprehensive technical documentation. • Assisted in the development and maintenance of CI/CD pipelines for application deployment. • Utilized Docker images for Behavior-Driven Development (BDD) reporting. • Participated in the creation of features based on functional specifications. • Analyzed and understood tasks to ensure accurate requirement gathering.		
Technology &Tools	Angular 13/14, HTML5, SCSS, Typescript, NgRx store, Unit testing (Jasmin), Jenkin, Gitlab (CI/CD), JIRA (Agile methodology), UX(Sketch/Figma)		

Project 3

Project Name	Merchant POC v1 & v2	Team Size	7
Company	Beauto Systems Pvt Ltd	Designation	Junior Software Engineer
Start Date	OCT 2020	End Date	JAN 2022
Project Description	The banking industry has undergone significant transformations over the past two decades, becoming more competitive, high-performing, and open than ever before. Discover how Beauto Systems is empowering banks to thrive in the digital economy and prepare for future advancements. The primary objective of this document is to finalize the Proof of Concept (POC) for the utilization of prepaid and companion cards in an on-demand card issuance service. This service will enable mobile wallet owners to conduct online transactions seamlessly.		
Role & Contribution	• Designed and developed user interface screens according to client specifications. • Conducted product demonstrations for clients, including a detailed presentation to the CTO of MFS. • Generated Web Application Archive (WAR) files for deployment. • Successfully deployed the application on both test and production servers. • Delivered a high-quality application, ensuring it met all performance and functionality requirements. • Authored comprehensive technical documentation to support the application. • Ensured the application achieved the required performance levels.		
Technology & Tools	Angular 12, Angular material, HTML5, CSS3, JIRA, Jenkin		

Project 4

Project Name	Victor	Team Size	7
Company	Beauto Systems Pvt Ltd	Designation	Junior Software Engineer
Start Date	NOV 2020	End Date	DEC 2021
Project Description	Victor serves as an intermediary between the Integrated Card Processing System (ICPS) and the MFS Hub, facilitating the following tasks: - Creating and retrieving card information. - Crediting and debiting cards to make funds available in mobile wallets. - Designed and developed user interface screens in accordance with client specifications, ensuring a seamless and intuitive user experience. - Maintained transaction data and ensured user authenticity through rigorous screening processes, enhancing security and reliability. - Integrated with the MFS Hub asynchronous API to facilitate mobile wallet operations, enabling efficient and real-time transaction processing. - Collaborated with cross-functional teams to gather requirements and deliver high-quality software solutions. - Implemented responsive design principles to ensure compatibility across various devices and screen sizes. - Participated in Agile development processes, including sprint planning, daily stand-ups, and retrospectives, to ensure timely and efficient project delivery. - Developed the project using Angular 10 and Angular Material for the front end, Java Spring Boot for the back end, and PostgreSQL for the database, ensuring a robust and scalable architecture.		
Role & Contribution	- Developed user interfaces using Angular 10, Angular Material, HTML5, and CSS3, based on designs from Invision. - Analyzed user requirements and integrated UI components with backend changes. - Collaborated closely with the design team in the USA and the product management team in Africa to create elegant and interactive interfaces for Victor. - Independently handled UI development and debugging for the project. - Authored comprehensive technical documentation. - Ensured optimal performance levels of the application. - Deployed the application on both test and production servers. - Delivered a high-quality application, meeting all client expectations.		
Technology & Tools	Angular 11, Angular material, HTML5, CSS3, Bootstrap, JIRA, Jenkin		

Project 5

Project Name	Skill India	Team Size	10
Company	Trans Neuron technologies Pvt ltd	Designation	Junior Software Engineer
Start Date	MAY 2019	End Date	JULY 2020
Project Description	Skill India is a campaign aimed at training over 400 million people in India in various skills by 2022. The SDMS Skill India portal serves as a mandatory single IT window, focusing on several key areas: • Training Partner Registration: Facilitates the registration process for training partners, ensuring they meet the necessary criteria to provide quality training. • Accreditation: Provides a standardized process for accrediting training centers, ensuring they adhere to the required standards and guidelines. • Affiliation: Manages the affiliation of training centers with recognized bodies, enhancing their credibility and reach. • Continuous Monitoring: Implements ongoing monitoring mechanisms to ensure training centers maintain high standards of training and infrastructure. • Skill Development: Aims to equip individuals with the skills needed to enhance their employability and contribute to the nation's economic growth. • Quality Assurance: Ensures that the training provided is of high quality and meets industry standards. This comprehensive approach ensures that the Skill India campaign not only increases the number of skilled individuals but also maintains the quality and relevance of the training provided.		
Role & Contribution	• Understood and analyzed the requirements. • Understood and analyzed the requirements for the Skill India campaign, ensuring a clear understanding of the project's objectives and goals. • Designed and coded the application, focusing on creating a user-friendly and efficient portal for training partner registration, accreditation, affiliation, and continuous monitoring. • Worked as a member of a development team consisting of 10 members, collaborating effectively to deliver high-quality and impactful solutions to the client. • Ensured the application met all quality standards through rigorous testing and validation processes. • Developed comprehensive technical documentation to support the ongoing development and maintenance of the portal. • Ensured the application maintained optimal performance levels, providing seamless user experience. • Deployed the application on both test and production servers, ensuring smooth transitions and minimal downtime. • Engaged with clients to gather feedback and make necessary adjustments, ensuring the final product met their expectations and requirements.		
Technology & Tools	Angular 5, HTML4/5, CSS2/3, Bootstrap, JIRA		

Project 6

Project Name	Pradhan Mantri Kaushal Vikas Yojana (PMKVY) & TOT/TOA	Team Size	4
Company	Trans Neuron technologies Pvt Ltd	Designation	Junior Software Engineer
Start Date	JUL 2019	End Date	DEC 2020
Project Description	This government initiative, integrated into the Skill India website, focuses on the recognition and standardization of trainer skills and the monitoring of training center facilities for the first time. The project encompasses the entire process, from applying for training center accreditation to the registration of trainers.		
Role & Contribution	• Developed web pages for training centers and partners. • Conducted thorough requirement analysis and understanding. • Designed and coded the application, ensuring optimal performance. • Engaged directly with clients to establish project parameters, analyze competitor websites, and communicate progress throughout the project duration. • Executed UI development and debugging for the project.		
Technology & Tools	Angular 5, HTML4/5, CSS2/3, Bootstrap		

Project 7

Project Name	Lenovo-Motorola	Team Size	10
Company	CONCENTRIX SERVICES INDIA Pvt Ltd	Designation	Customer Support Executive
Start Date	NOV 2017	End Date	MAR 2019
Project Description	A dedicated and results-oriented professional with a proven track record in delivering exceptional customer service and effectively resolving inquiries. Highly skilled in problem-solving, adept at addressing and resolving complex customer issues to ensure high levels of satisfaction. Proficient in utilizing CRM software, managing high-volume call centers, and implementing process improvements to enhance service delivery. Strong communicator with the ability to build rapport with clients and collaborate effectively with cross-functional teams. Known for fostering a collaborative work environment and contributing to team success. Eager to leverage my expertise and experience to add value to a dynamic organization.		
Role & Contribution	• Provided prompt and courteous assistance to customers via phone, email, and live chat, addressing their inquiries, concerns, and issues effectively. • Demonstrated a deep understanding of the company's products and services, enabling me to provide accurate information and solutions to customers. • Resolved customer complaints and issues efficiently, achieving a resolution rate of 90% within the first contact, exceeding departmental goals.
